**FISCAL IMPACT -**

There will be a fiscal impact to the City since improvements made to properties will be abated based on the schedule applied for and the number of years the property is eligible for abatement. Taxes on these properties will not become part of the revenue stream until the abatement period ends.

The City Assessor will determine the exact amount of the

impact after inspection of the improvements by his office. The assessor must determine whether the improvements to the property have increased the property value by five percent in order to be eligible for tax abatement.

The City approved tax abatement to stimulate growth in the City and compete with the areas outside the City. This program has worked well and attracted residential development back to the City. The City has attracted an average of 260 single-family units, 12 duplex units, and 210 multi-family units or an average of 488 units per year since 1990. That development in the long run aids the City in attracting businesses and keeps people looking for residences in the City rather than outside the City. Developers have identified tax abatement as an initiative for attracting buyers for their units. The abatement program has also aided in upgrading deteriorating property in the City by providing an incentive to maintain and upgrade property.
