BACKGROUND -

Des Moines Water Works has determined that the water mains on County Line Road and on Fleur Drive need to be lowered to protect the water mains from freezing due to the new grade being constructed on Fleur Drive as part of this paving project. Past practice has developed an understanding with the Des Moines Water Works that the City will pay for lowering or relocating water mains greater than 12" in size. Since the water main on County Line Road is a 20" water main, the cost to lower this main will become part of the project cost.

Des Moines Water Works will bear the expense of extending the 20" water main to insure that it will be beyond the proposed paving on Fleur Drive. If an extension is ever required in the future, the paving on Fleur Drive will not need to be disturbed. In addition, Des Moines Water Works will pay for lowering the 12" water main on Fleur

Drive north of County Line Road. The prices for this water main work have been negotiated with McAninch Corporation and have been deemed to be acceptable by Des Moines Water Works.
