Ingersoll Avenue 3-lane Conversion Project - 2009

1. Please allow the presentation to be completed without interruption.
2. If you have a question or comment, please be courteous of others and wait your turn.
3. Please refrain from making accusations and/or derogatory comments.
4. Please respect your neighbors' rights to hold opinions differing from your own.

Be aware that we all care about Ingersoll Avenue or we would not be at this meeting. Let's work together to create the best plan for Ingersoll's future.

Project History

- 1) 2002 – traffic flow was reviewed in preparation of Grand Ave closing for MLK and upcoming I-235 construction. Left turn lanes were added at signalized intersections (some parking was removed)
- 2) 2004 – as part of Ingersoll Improvement Plan, traffic flow was again revisited. The Plan called for a “unified, pedestrian-friendly street”. The planning process included considerable discussion of alternate lane configurations, most notably striping three lanes with bike lanes. The traffic analysis concluded that the 3-lane alternative would not adequately handle peak traffic levels; therefore, the current 4-lane configuration should remain in place.

Project History

- 3) 2007-08 – Ingersoll Streetscape Project constructed
- 4) 2009 – Following completion of I-235 and MLK, traffic flows are again reviewed. January 5, 2009 Council directed staff to revisit parking/street issues.

Ingersoll Avenue 3-lane Conversion Project – 2009

Project Details

- Definition of Traffic Engineering: “Safe and Efficient movement of people and goods”
- Ingersoll Ave. is a “Complete Streets” proposal
- Low-cost project (\$10,000 – pavement marking only, no changes in curbs)
- Extensive traffic modeling done [review traffic modeling]
- Little to no traffic diversion is expected
