Project Description

The relocation of 709 East Locust will result in the preservation of a 133 year old row house. The building will be relocated to 425 East Grand and be positioned to engage the street and pedestrian nature of the East Village. The building will have an addition built at the rear of the building to allow the historic structure to remain intact and new restrooms and kitchen will be constructed in the addition. The first floor will have a restaurant, and will be nearly 2000 square feet in size. The first floor will also have an outdoor patio on the west side of the building. The second floor will be office space and be approximately 1600 square feet.

The building scale and architecture is similar to the building on East 5th, and the building and the site placement encourage the pedestrians to turn the corner and proceed west at the corner. This is the first step in making the block a complete block. The remaining site allows for a significant project to be built similar in scope to e300.

Wow and Transformative Design

1. The site will have a rain garden to allow for storm water management.
2. The building weighs 430,000 pounds and we will pick it up and move it down the street.
3. We will preserve a 133 year old building.
4. The uses will add to the street energy on Grand Avenue
