

Roll Call Number

Date May 6, 2013

WHEREAS, on August 7, 2000, by Roll Call No. 00-3381 the City Council adopted the Des Moines 2020 Community Character Land Use Plan; and

WHEREAS, the City Plan and Zoning Commission has advised in the attached letter that at a public hearing held April 18, 2013, the members voted 14-0 to recommend APPROVAL of a request from the Neighborhood Revitalization Board to amend the Des Moines' 2020 Community Character Plan to incorporate the Lower Beaver Neighborhood Plan as an element.

NOW THEREFORE, BE IT RESOLVED, by the City Council of the City of Des Moines, Iowa, that the proposed amendment to the Des Moines 2020 Community Character Land Use Plan described above, is hereby approved.

MOVED by ______ to approve the proposed amendment.

FORM APPROVED:

Michael F. Kelley Assistant City Attorney (21-2013-4.10)

APPROVAL of a request to amend the Des Moines' 2020 Community Character Plan to incorporate the Lower Beaver Neighborhood Plan as an element. (21-2013-4.10)

STAFF RECOMMENDATION TO THE P&Z COMMISSION

Staff recommends that the Des Moines' 2020 Community Character Plan be amended to incorporate the Lower Beaver Neighborhood Plan as an element.

STAFF REPORT

I. BACKGROUND INFORMATION

The Lower Beaver Neighborhood Association (LBNA) was selected to participate in the Neighborhood Revitalization Program in November 2011 as a "Stable Neighborhood". In December 2011, City staff met with the LBNA

CITY PLAN AND ZONING COMMISSION ARMORY BUILDING 602 ROBERT D. RAY DRIVE DES MOINES, IOWA 50309 –1881 (515) 283-4182

> ALL-AMERICA CITY 1949, 1976, 1981 2003

Planning Committee for the first time. On February 20, 2012, the planning committee and staff held a neighborhood-wide input meeting at Polk County River Place. Input from this meeting helped the Planning Committee establish and prioritize the issues to address during the planning process. A second neighborhood-wide meeting was held on November 12, 2012 to present the goals and strategies of the plan to neighborhood residents.

II. GENERAL PLAN SUMMARY

The Lower Beaver Planning Committee has met monthly since January 2012 to develop the neighborhood plan. The Planning Committee discussed a wide range of topics, including: infrastructure, housing, parks and trails, commercial corridors, and land use and zoning.

Two areas of particular interest to the committee were the housing, as well as the parks and trails topics. The committee would like to see the housing stock in the neighborhood maintained at a high level. To accomplish this the neighborhood will work closely with the NFC to promote the programs available to homeowners and homebuyers. Analysis of the housing stock shows that foreclosed and abandoned homes are not overly prevalent in the Lower Beaver Neighborhood. However the neighborhood has seen a slight uptick in this in recent years. The committee and staff observed during the planning process that most of the homes that were foreclosed upon in the past year were purchased, rehabilitated and put back on the market relatively quickly. This is a good sign for the neighborhood and is another indicator of the stability of the housing market in the neighborhood.

Another topic of focus was the old Beaver Airfield located along Lower Beaver Road. The property is currently privately owned and listed for sale on the real estate market. The property is a large parcel that only has one small office building located on it and is situated just west of Woodlawn Park. Because the property adjoins the park, the neighborhood would like to see the linkage to the park enhanced if development were to occur. If the property is to remain open space for an extended period of time, the neighborhood would like to consider expansion of the park to the west to incorporate an additional soccer field.

During the planning process the committee also discussed with staff desired improvements to Woodlawn Park. The existing tennis court is in need of playing surface repairs and would benefit from also being painted for pickleball use. The existing half-court basketball court would be better utilized if it were upgraded to a full court layout. The neighborhood is served by the Trestle to Trestle Trail but the neighborhood has limited access to this trail. In order to improve access the committee discussed with staff opportunities to install a connection leading eastward from Sawyer's Landing through the Tai Dam property to the trail. This would also provide a direct link from Woodlawn Park to the Trestle to Trestle Trail.

This plan does not include any recommended land use or zoning changes. Development opportunities, such as the old Beaver Airfield, were discussed during the planning process and the neighborhood emphasized preserving the residential character of the area and strengthening the commercial districts along Douglas Avenue. Planning Committee members worked with City of Des Moines Public Works staff to examine the infrastructure in the neighborhood. Based on this input, staff provided an initial list of proposed improvements, which was amended and approved by the planning committee. NIRP improvements in the neighborhood were all completed during the 2012 construction season.

Overview of NIRP Improvements

Street HMA Overlay	\$ 191,240 – City CIP NIRP
Concrete Pavement Restoration	\$ 133,900 – City CIP NIRP
Interim Paving	\$ 335,420 - City CIP NIRP

Total NIRP for Lower Beaver

\$ 660.560 – City CIP NIRP

Potential City Projects

- Explore options for installing a trail eastward from the Sawyer's Landing subdivision to the Trestle to Trestle Trail.
- Work with the LBNA and area businesses to promote the City's Façade Program.
- Partner with the LBNA to monitor foreclosed and abandoned housing to ensure that it does not become a problem in the neighborhood.
- Secure funding for improvements to Woodlawn Park, such as tennis court repairs, upgrading the basketball court to a full court, and general landscaping improvements.

Neighborhood Led Projects and Initiatives

- Work with potential developers and the City to ensure that if the old Beaver Airfield site is developed that it is done in a way that is in character with the surrounding neighborhood.
- Educate residents about tools available for home repair / improvement and improve NFC promotional efforts.
- Engage the owners and managers of multi-family housing units, as well as the tenants, in order to get them more involved in the association.
 Work with local businesses and the Urbandale Chamber of Commerce to promote businesses along the Douglas Avenue corridor.

SUMMARY OF DISCUSSION

There was no discussion

CHAIRPERSON OPENED THE PUBLIC HEARING

There was no one to speak in favor or in oppositions of the applicant's request.

CHAIRPERSON CLOSED THE PUBLIC HEARING

COMMISSION ACTION:

<u>Greg Jones</u> moved staff recommendation that the Des Moines' 2020 Community Character Plan be amended to incorporate the Lower Beaver Neighborhood Plan as an element.

Motion passed 14-0.

INTRODUCTION

Background on the Neighborhood Revitalization Program

The City of Des Moines and the Polk County Board of Supervisors established the Neighborhood Revitalization Program in the early 1990s to help stabilize and improve Des Moines' neighborhoods. To coordinate this program, the City's Community Development Department formed the Neighborhood Development Division.

The Neighborhood Revitalization Program uses a strategy that calls for neighborhood residents, the City of Des Moines, Polk County, and local business leaders to develop a public/private partnership to address revitalization issues within the city. To participate, recognized neighborhoods must submit an application and make a presentation to the Neighborhood Revitalization Board. The neighborhood planning process relies on active resident groups to identify critical neighborhood issues in their area. The staff of the Neighborhood Development Division provides technical assistance and planning coordination. Neighborhood planning staff works with the neighborhood group to develop appropriate goals and implement a feasible action plan. The neighborhood plan provides a list of activities and identifies parties responsible for implementation. The success of the revitalization effort depends on a continued coordination of efforts among the neighborhood organization, the City, the County, and other public and private organizations.

This plan was prepared through a joint effort of the City of Des Moines Community Development Department's Neighborhood Development Division and the Lower Beaver Neighborhood Association. The approved plan becomes an amendment to the City of Des Moines Comprehensive Plan and an ongoing guide affecting future policy decisions for the Lower Beaver neighborhood.

Planning Process

The planning process for the Lower Beaver neighborhood plan was similar to how we conduct most of neighborhood plans in that a planning committee of neighborhood residents, business owners, and other stakeholders work with a Planner from our Neighborhood Development Division to develop the plan. The planning process officially started with a neighborhood kickoff meeting in February 2012. At this meeting attendees laid the groundwork for the planning process by identifying five priority subject areas to focus on. The subject areas that Lower Beaver chose to focus on were: Housing, Commercial Corridor, Infrastructure, as well as Parks and Trails. A Land Use and Zoning analysis was also incorporated as part of the planning process. The planning committee met once a month throughout the process to identify key issues within each of the subject areas and then to create goals and strategies to address those issues. The planning committee meetings were facilitated by neighborhood planning staff, with staff members from various City departments participating periodically. Once the draft goals were and strategies were identified a second neighborhood meeting was held to share these ideas and get additional feedback from residents. Once the goals and strategies were finalized, they were reviewed, prioritized, and approved by the planning committee. The plan was then approved by the Lower Beaver Neighborhood Association Board, the Neighborhood Revitalization Board, the Des Moines City Council, and the Polk County Board of Supervisors.

Vision Statement

The planning committee utilized the input from the first neighborhood meeting to establish a vision statement for the neighborhood plan. A vision statement provides overall direction and serves as a source of inspiration for the neighborhood planning process and is the basis for the neighborhood plan. Below is the vision statement for Lower Beaver.

The Lower Beaver Neighborhood strives to be a welcoming neighborhood that people want to call home by fostering an environment which...

...supports vibrant, viable businesses, new and old;

... provides quality housing stock for a diversifying population;

...offers enriching opportunities for community relationships and participation, education, and cultural exposure;

... features attractive parks, trails, trees, and year-round recreational opportunities;

...is environmentally responsible, preserving our natural resources, ecology, wildlife, and habitats; and

...maintains an infrastructure effective for the safety and service of all residents, young and old.

Housing

The Lower Beaver Neighborhood entered the Neighborhood Revitalization Program in 2011 as a "Stable" neighborhood. This assessment as a stable neighborhood was based on a number of factors such as home values, home sales, housing conditions, the ratio of homeowners to renters, etc. This is further supported by visiting the neighborhood where you will find block after block of well maintained homes.

The housing stock in Lower Beaver is diverse in terms of the range of architectural styles, as well as the age and values of the homes. The average year built for homes in Lower Beaver is 1959 and the average value of a home is \$152,158. Of the approximately 2,300 homes located within the neighborhood, 99% of them are considered to be in normal, above normal, very good, or excellent condition, as identified by the Polk County Assessor's Office.

Although the housing stock in Lower Beaver is well kept, the majority of the homes in the neighborhood are nearing 50 years old. As homes age, the maintenance needs typically increase as systems near the end of their useful life. Keeping homes updated not only improves the value of the home but also the efficiency of the homes. One strategy to improve the housing stock is to encourage homeowners and homebuyers to utilize the programs made available through the Neighborhood Finance Corporation (NFC). These programs allow homeowners and homebuyers to renovate their homes by updating the major systems, building an addition or garage, or making kitchen and bathroom improvements that ultimately improve the function and value of the home. The neighborhood will work with staff from the NFC to promote the availability of this program.

The planning committee also discussed the importance of well maintained and well managed rental properties with the neighborhood. During the planning process, it was determined that a strong relationship is lacking between the LBNA and the rental community (including investor-owners, property managers, and rental tenants). It is suggested that the LBNA take a more active role in engaging these neighbors because having good quality tenants and well-kept property can increase the return on investment for the property owner/manager, resulting in a win-win situation for the owner, tenant, and neighborhood. The LBNA can also help match investor owners with resources such as the Crime Free Multi-Housing Program offered by the Des Moines Police Department, which trains property managers on how to screen tenants, prevent crime, make security improvements to the property, and engage tenants in safe living practices.

Another area of discussion for the planning committee was the lack of diverse housing options in the neighborhood. The pre-dominant housing type in the Lower Beaver Neighborhood is single-family homes with some multi-family apartment dwellings scattered throughout the neighborhood. There is a lack of alternative housing types such as townhomes, condos, and senior housing options. As long time residents age, there are few alternative housing choices available to keep them in the neighborhood. Developing a broader range of housing options is a goal of the neighborhood going forward.

Commercial Corridor

The Douglas Avenue and Euclid Avenue corridor is a major east-west corridor on the north side of Des Moines. The corridor consists of a mix of retail, entertainment, restaurant, automotive, and service oriented businesses. The 2020 Community Character Plan identifies Euclid/Douglas corridor as a gateway corridor. Gateway Corridors are defined as, "...approaches and connections to distinct residential, institutional, and commercial districts. Gateway corridors include those streets that lead to the downtown or run through a large expanse of the city connecting important landmarks and districts...". These corridors are important areas for not only the neighborhoods that surround them but the City and metro as well.

The health and viability of the Euclid/Douglas corridor is important to the Lower Beaver Neighborhood. The Euclid/Douglas corridor has seen some turnover in the commercial district in recent years. Some of those buildings have been reoccupied but others have been challenged to sustain a viable business or tenant. Updating this area to keep pace with other commercial districts and remain competitive within the Des Moines and metro economic arena is a priority for the neighborhood.

Business and property owners should focus on making property and site improvements to update their establishments to attract more customers and retain businesses. Additionally, the neighborhood is supportive of minimal extension of commercially zoned areas along Douglas/Euclid to accommodate reuse and redevelopment of neighborhood retail and commercial uses. To do this successfully there must be a balance to strengthen and grow the commercial corridor but also to be sensitive to the adjoining residential areas that are adjacent to commercially zoned properties.

Making improvements to the commercial corridor will require business leaders, neighborhood leaders, property owners, and City officials to come together and collectively develop strategies and resources. Many of the businesses along Douglas Avenue are members of the Urbandale Chamber of Commerce. The Urbandale Chamber may also play an important role in promoting the area.

For this section of the plan it is difficult to identify implementation timelines, as some projects are dependent on market conditions and private investment. Because of this the planning committee chose to identify and rank those initiatives that at the time of the planning process were considered to be catalysts to improve the commercial areas.

Infrastructure

A key component of the Neighborhood Revitalization Program is the Neighborhood Infrastructure Rehabilitation Program (NIRP). This program targets infrastructure rehabilitation in Designated neighborhoods and provides improvements above and beyond the City's annual street and curb maintenance program. The funding for this program is provided by the City of Des Moines' Capital Improvement Program (CIP).

In most cases the available NIRP funding is not able to meet all the infrastructure needs within a neighborhood. Because of this City staff relies on the neighborhood planning committee to assist in the allocation of these limited resources. Public Works staff provides a list of existing infrastructure needs in the neighborhood to the committee for consideration.

The Lower Beaver Neighborhood was allocated \$665,000 in NIRP funds in 2012 to make infrastructure repairs. The Planning Committee favored street repairs as their top priority. Unmet infrastructure needs remaining after NIRP will be considered for inclusion in future City-wide maintenance programs as conditions, priorities, and funding allow.

NIRP Improvements in the Lower Beaver Neighborhood

	Lawnwood Drive – Hillcrest Dr to Lindlavista Way		

Parks and Trails

Access to recreation, including Parks and Trails, is important to the quality of life of residents. Park and Open Space add economic and social value to the surrounding area. Parklands also provide aesthetic enhancement and environmental benefits while contributing to the composition and urban fabric of the neighborhood and City.

The Lower Beaver Neighborhood is fortunate to have Woodlawn Park located in the heart of the neighborhood. This Park is located just south of the intersection of Twana Drive and Lawnwoods Drive. Woodlawn Park is approximately 6.8 acres in size and includes the following amenities:

- Half Basketball Court
- Two Tennis Courts
- Community Garden
- Open-Air Shelter
- Playground Equipment

- Water Spray Feature
- Picnic Tables
- Charcoal Grills
- Portable Restrooms
- Off-Street Parking

While the park provides open space and recreational opportunities for neighborhood residents there are some features that are dated and in need of updating. The tennis courts for example are due for resurfacing and the half basketball court would be better utilized if it were expanded to a full court layout. The open space in the southwestern portion of the park is heavily used for youth soccer practice and games. This open area should be retained and maintained to allow for continued soccer use, and if the opportunity presents itself, should be expanded for additional soccer usage.

Woodlawn Park, like many City Parks, does not have a master plan prepared to guide future development of the Park. If improvements are proposed for Woodlawn in the future, it is recommended that a site plan for the park be put together with additional neighborhood input. The parcel immediately west of Woodlawn Park is currently under utilized and for sale. The future of this site is currently unknown and will need to be monitored closely going forward.

The need to strategically plan for and implement improvements at Woodlawn is a priority for both the City's Parks Department and Neighborhood Association. It may be necessary to pursue both public and private funding to implement the goals set forth in this section of the plan.

The Lower Beaver Neighborhood is connected to the Greater Des Moines and Central Iowa Trail System via the Trestle to Trestle Trail. This trail runs primarily along the Des Moines River basin and connects to other trails in northwest Des Moines such as the Inter-Urban and Neil Smith Trails. Access to the Trestle to Trestle Trail within the Lower Beaver Neighborhood is limited to points near Euclid Avenue and Lower Beaver Road.

The neighborhood would like to add another access point to the trail going east from the Sawyer's Landing Subdivision. This would allow for better access to the trail but would also provide a direct link to and from Woodlawn Park. In order to accomplish this, there will need to be coordination between area property owners, the Tai Dam Village organization, the LBNA, and City staff from the Parks and Community Development Departments.

LAND USE & ZONING

Land use and zoning are two tools that local governments use to guide development. The City of Des Moines' 2020 Community Character Land Use Plan sets an overall vision for development and may be used to define the character of an area. The Future Land Use Plan is not parcel specific and does not give a parcel any legal rights for use. Zoning, on the other hand, is parcel specific and legally binding. By State law, changes to the zoning designations must be based on the Future Land Use Plan.

The planning committee worked with City of Des Moines planning staff to analyze the land use and zoning designations for Lower Beaver. The neighborhood is predominately residential with low-density residential future land use designations and R1-60 or R1-80 zoning, which allows single-family residential dwellings. There are also public/semi-public and parks/open space future land use designations for the school and park facilities. The commercial areas along Douglas Avenue are comprised of Commercial Corridor or Small Scale Strip Development future land use designations and C-0, C-1, or C-2 zoning. While no immediate changes to the future land use designations or zoning districts were identified, the emphasis was placed on preserving the residential areas and strengthening the commercial district along Douglas Avenue.

In order to strengthen the commercial districts, the City of Des Moines and the Lower Beaver Neighborhood Association will seek compliance with current zoning and site plan regulations along Douglas Avenue to the extent reasonable, while still accommodating and encouraging reuse and redevelopment for neighborhood retail and commercial uses. Additionally, the Lower Beaver Neighborhood supports minimal extension of commercially zoned areas along Douglas Avenue to accommodate adaptive reuse and redevelopment of neighborhood and retail uses. Any expansion of commercial areas would need to be sensitive to adjoining residential areas and provide an adequate buffer between commercial and residential uses.

Since the Lower Beaver Neighborhood is built-out, with little opportunity for new development to occur, the former airfield site at 4209 Lower Beaver Road is one of the few parcels available for redevelopment in the neighborhood. Because of its location in the heart of the neighborhood and its redevelopment potential, the planning committee discussed possible future uses of the property. The site adjoins Woodlawn Park. So, there is an opportunity for better connection to the park from the neighborhood; or it is possible to expand the park in conjunction with a redevelopment proposal.

Whether the former airfield site is redeveloped or remains open space is yet to be seen. Although the neighborhood's preference is to expand Woodlawn Park to the west, the neighborhood association is eager to work with any potential developer to ensure that the land use would be compatible and complimentary to the Lower Beaver Neighborhood. In order that this may occur, it is recommended that a Planned Unit Development (PUD) zoning classification be established prior to development. A PUD will allow the neighborhood association to provide their input on the conceptual plan prior to development, which will ensure that it is in harmony with the existing neighborhood character and preserves open space while providing desired neighborhood linkages to Woodlawn Park.

This section of the neighborhood plan is intended to be a policy guide for future land use and zoning discussions. It should be considered a guideline for development and not a strict determinant so that it can be flexible enough to allow for changing environments, contemporary development practices and other needs that cannot be foreseen.

Implementation

This section is crucial to the success of the plan and the revitalization of the neighborhood. The implementation phase of the Neighborhood Revitalization Program requires a substantial commitment of time and resources. In order to be successful, it is essential that the Lower Beaver Neighborhood Association continue to collaborate with the City of Des Moines and other community stakeholders. It will also require the following:

- Strong and active leadership from the Lower Beaver Neighborhood Association (LBNA).
- Continued commitment and support from the Des Moines City Council and the Polk County Board of Supervisors.
- Technical assistance from Neighborhood Planning staff and other City staff when appropriate.
- Engagement and support from neighborhood residents, area businesses and property owners, and other neighborhood stakeholders.
- Financial support and availability of resources.

At this stage, the leadership baton is passed from the City to the Neighborhood Association. For plan implementation, the Lower Beaver Neighborhood Association must take ownership of the plan and advocate for the goals and projects identified in the various sections of this plan to be completed. It will be necessary to create the political will to support revitalization efforts and also to solicit the help of other partners.

In addition to leading the charge, the LBNA has agreed to be an educator and disseminator of information, a resource and advocate for residents and stakeholders, and an advisor to City of Des Moines staff for neighborhood issues and projects. The LBNA has committees in place that will also lead some of the implementation duties and work toward accomplishing the goals identified in this plan. Those committees will be charged with overseeing their appropriate section of the plan, prioritizing activities, recruiting volunteers when necessary, and measuring success. It is imperative that the LBNA communicates regularly with the neighborhood about upcoming activities and that they celebrate accomplishments.

In addition to the neighborhood association, the City and County will continue to engage other partners from the public, non-profit and private sectors in plan implementation when appropriate. This may include identifying financing mechanisms above and beyond traditional resources. The Neighborhood Finance Corporation will be an important resource to improve the housing stock but the neighborhood association will play a role in driving the NFC's lending activities through promoting those services to residents. The Neighborhood Development Corporation and the City's Office of Economic Development may also be viable partners when it comes to the revitalization of the Euclid and Douglas Avenue Corridor.

The Neighborhood Development Division will check in periodically with the Lower Beaver Neighborhood Association to assess progress on plan goals. Once the neighborhood plan has been substantially completed, Neighborhood Planning staff will recommend that the program be ended and the Lower Beaver neighborhood graduated to Charter status. Completion of the plan does not necessarily mean that all items have been accomplished. It is possible that certain activities may be investigated and found not to be feasible or to require an unreasonable demand of resources. In addition, conditions and opportunities change over time, requiring that priorities be periodically reevaluated.

Once the plan has been found to be substantially completed, a report will be prepared with input from the neighborhood association and forwarded to the Neighborhood Revitalization Board. Pending its approval, the recommendation will be forwarded to the Des Moines City Council and the Polk County Board of Supervisors for final approval. At this point the neighborhood becomes a Charter Neighborhood and is phased out of the Neighborhood Revitalization Program.

Glossary of Terms

2020 Community Character Plan Land Use Designations

Low Density Residential – Areas developed with single-family homes and duplexes legal as of December 31, 1996, with up to 6 units per acre.

Commercial Corridor – Small-to-moderate scale commercial in a linear pattern that serves the adjacent neighborhood and passing motorists. Building sizes range from 2,000 to 35,000 square feet.

Small-Scale Strip Development – Small-to-moderate commercial in a linear pattern that serves the passing motorist. Individual building may be over 35,000 square feet with individual modules from 2,000 to 20,000 square feet.

Park/Open Space – Uses include parks, golf courses, trails, zoos, and cemeteries.

Public/Semi-Public – Uses such as government facilities, schools, and hospitals.

Zoning District Classifications

C-0 : Commercial-Residential – Intended and designed to provide for the development of professional and low-intensity business offices in areas where residential dwellings predominate.

C-1 : Neighborhood Retail Commercial – Intended to provide for the convenience shopping of persons living in residential areas and for general uses and activites of a retail and personal service character. In addition, low-intensity business and professional offices are permitted.

C-2 : General Retail and Highway-Oriented Commercial – Intended to provide for major retail shopping areas, other than shopping centers in C-4 districts, outside the downtown area. The district includes, as well, much of the strip commercial property existing along the major city streets and highways. The uses permitted are intended to accommodate both the general retail consumer and the needs and services of the automobile traveling consumer.

PUD : Planned Unit Development – Intended and designed to encourage large-scale and quality development of vacant or underutilized tracts of land throughout the city pursuant to a unified building and site development plan incorporating a comprehensive design based on a thorough application of professional standards of excellence. It is further the intent of this division to allow greater flexibility of standards and diversification of land uses than provided in the regulations of other zoning districts.

R1-60 & R1-80 : One-Family Low-Density Residential – Intended and designed to provide for certain areas developed primarily with one-family detached dwellings and areas where similar residential development seems likely to occur.

General Acronyms and Abbreviations Referenced in the Plan

CD : City of Des Moines Community Development Department – The City Department that is responsible for planning, promoting, developing, and maintaining Des Moines social, physical, and business environments.

CIP : City of Des Moines Capital Improvement Program – A short range plan that identifies capital projects and equipment purchases, provides a planning schedule, and identifies options for financing.

DART : Des Moines Area Regional Transit – The public transit agency that serves Des Moines and other communities in Polk County and the surrounding Metro Area.

DMPD : Des Moines Police Department – The Police Department for the City of Des Moines.

HMA : Hot Mixed Asphalt – An engineered product composed of 95% stone, sand, and gravel along with 5% asphalt cement (a petroleum product) that is used to pave streets.

LBNA : Lower Beaver Neighborhood Association – The neighborhood organization recognized by the City of Des Moines that serves the area bound by Douglas/Euclid Avenue on the south, I-80/35 on the north, the Des Moines River on the east, and Beaver Avenue on the west.

NCS : Neighborhood Conservation Services Division – A division of the City of Des Moines Community Development Department that is responsible for implementing various affordable housing programs for low-moderate income families and individuals, while expanding the City's housing stock and revitalizing neighborhoods.

NDD : Neighborhood Development Division – A division of the City of Des Moines Community Development Department that is responsible for coordinating the Neighborhood Revitalization Program (NRP).

NDC : Neighborhood Development Corporation – A non-profit, community-focused organization that revitalizes distressed neighborhoods and encourages neighborhood sustainability. NDC fulfills its mission by offering commercial and residential options through building rehabilitation, new construction, and in-fill development. For more information, visit: www.ndcdesmoines.org

NFC : Neighborhood Finance Corporation – The NFC provides unique lending programs and related services to help revitalize targeted neighborhoods in Polk County through partnerships with residents, government entities, community-based organizations, and the business community. For more information, visit: <u>www.neighborhoodfinance.org</u>

NIRP : Neighborhood Infrastructure Rehabilitation Program – The program targets infrastructure rehabilitation in Designated Neighborhoods, and provides improvements above and beyond the City's annual street, curb, and sidewalk maintenance programs.

NRB : Neighborhood Revitalization Board – An appointed citizen board that advises the Des Moines City Council and Polk County Board of Supervisors on housing improvements and neighborhood revitalization efforts.

NRP : Neighborhood Revitalization Program – The City of Des Moines and Polk County created the NRP in 1990 to help stabilize and improve neighborhoods in Des Moines. The NRP uses a strategy that calls for neighborhood residents, City, County, local business leaders, and the Neighborhood Finance Corporation (NFC) to develop a public/private partnership that addresses revitalization issues. The NRP also gives citizens the opportunity to organize and create neighborhood groups that can be officially recognized by the City Council and County Supervisors.

OED : Office of Economic Development – The City of Des Moines department that is responsible for assisting businesses to locate and expand in Des Moines.
