ARTICLE V. VEHICLE TRANSPORTATION SERVICES

Sec. 126-226. Statement of policy and purpose.

- (a) It is the policy and purpose of the City of Des Moines to promote adequate and satisfactory vehicle for hire services that will promote a positive image to residents and visitors within its corporate limits. To achieve this goal, this article provides for the regulation of companies providing transportation services that will reasonably protect the public interest, welfare, health and safety, and will promote the availability of transportation services to the public while protecting the principles of free enterprise.
- (b) The rights granted under this article are, at all times, subservient to the right of the City to fully exercise its rights of control over the streets, alleys and public ways of the City of Des Moines.

Section 126-227. Definitions.

The following words, terms and phrases when used in this article have the following meanings, except where the context clearly indicates a different meaning:

Paratransit service means specialized transportation services only for wheelchair bound persons provided by a paratransit taxicab.

Paratransit taxicab means a taxicab equipped and operated exclusively for the provision of paratransit services.

Person means any individual, firm, corporation, company, association, partnership or any combination thereof, or two or more persons having joint or common economic interest. The word person includes the singular and the plural.

School bus means a vehicle used primarily for the transportation of a school's students and staff.

This level of limited mobility would be noted by the requirement for an assistive device (wheelchair, walker or gurney, for example) to provide limited mobility. A cane, in and of itself, does not meet the degree of severity or limited mobility necessary to qualify as wheelchair bound. If the disability is of a temporary nature, once that person is able to meet the physical and/or mental requirements of the State of Iowa to become licensed to legally drive, that person would no longer be considered wheelchair bound.

The traffic engineer shall provide the specifications for the driver identification cards and shall approve the locations where they are displayed. The driver identification cards for each vehicle shall be provided for every driver by each VHC certificate holder at its sole cost and expense. A TSV driver may provide this information through an online platform that is reviewable to passengers from the time a ride is accepted through the duration of the trip.

Holders and drivers operating vehicle transportation services at the airport shall do so in accord with rules, regulations, and policies adopted by the airport authority.
