**TERMINATION OF THE DES MOINES LEVEES SYSTEM FEASIBILITY STUDY
AND AGREEMENT BETWEEN THE DEPARTMENT OF THE ARMY
AND THE CITY OF DES MOINES FOR
THE DES MOINES LEVEE SYSTEM**

WHEREAS, the United States Congress authorized a feasibility study of the Des Moines and Raccoon Rivers to evaluate the impacts of the increased flood risk identified in the 2010 Des Moines River Regulated Flow Frequency Study which indicated the current levee system provides lower than 1% annual chance exceedance level of protection; and

WHEREAS, Corps of Engineers provided a Federal Cost Share Agreement that provides for a study to identify and evaluate alternatives and the preparation of a decision document that, as appropriate, recommends a coordinated and implementable solution for enhancement of Des Moines levee system flood protection; and

WHEREAS, on August 10, 2015, by Roll Call 15-1337, City Council approved the Federal Cost Share Agreement provided by the Corps of Engineers; and

WHEREAS, as part of the prepared study, the Corps of Engineers has not been able to economically justify the Des Moines Levee System project and have found the benefit/cost to be less than 0.5, significantly less than the 1.0 minimum required to support a Federal project; and

WHEREAS, the Corps of Engineers have offered options at additional cost to the City, including further analyzing the benefit/cost; and

WHEREAS, due to the low probability of success and the increased cost of proceeding, the City Council supports terminating the study and agreement, as provided in Article IV of the Federal Cost Share Agreement.
