WHEREAS, the City of Des Moines recognizes the need for a City tree inventory and desires to obtain such inventory with partial funding from the private sector; and

WHEREAS, the City of Des Moines desires to procure the services of a consultant to conduct a GIS based tree inventory of City trees within the right-of-way and City park system, which would include a tree management plan, web based software management system and software maintenance and training services, to enable City staff to keep such database up to date and to enhance the City's ability to manage the City's urban forest; and
